12. BCS Token is not a consumer product and its holders accepts explicitly and agree to it that they are not covered by the consumer protection regulation of any jurisdiction.

13. BCS Tokens can be exchanged for internal Platform BCB Tokens, which can be used as a form of a 100% discount for digital goods and services on the Platform. The number of BCB tokens, which can be obtained by the Participant, depend on the amount of BCS Tokens in his possession and is calculated according to the following formula: $CB = C * (B / BT)$, - where CB is the amount of bonus tokens which a Participant gets for holding a certain amount of BCS tokens (the amount of tokens owned is indicated by B), while BT indicates the total amount of BCS tokens issues, and C is the total number of bonus tokens generated since the last call of the owner of BCS tokens. BCSHOP.IO profits will be generated through a small sales fee (0.5%-2% under provisions of Terms relative to Vendor agreement) of the Platform, which will be withheld from every payment (from the Vendor's side (the definition of the “Vendor” is provided in Terms relative to Vendor agreement available on the Website)) and will be received to a separate BCSHOP.IO smart contract. 80% of the fees will be used to provide BCB Tokens with ETH value. The cost of exchange of BCS Tokens on BCB Token is 1 (one) BCS Token. 1000 (one thousand) BCB tokens equals to 1 (one) ETH.

Appendix B

RISKS

The Participant understand that BCS and BCB Tokens, blockchain technology, Ethereum, Ether and other associated and related technologies are new and untested and outside of BCSHOP.IO's exclusive control and adverse changes in market forces or the technology, broadly construed, may prevent or compromise BCSHOP.IO's performance under this agreement.

Participant agree that no other party (including, without limitation any) may be held liable for any loss arising out of, or in any way connected with Participant's participation in the BCS Token-sale, or receiving and holding Tokens or such risk.

In addition to the above, the Participant also acknowledge that prior to receiving Tokens he have been warned of the following risks, associated with the Website, the BCSHOP.IO Tokens, the Platform and other relevant technologies mentioned herein:

A) Legal risks regarding securities regulations

There is a risk that in some jurisdictions the BCS Tokens might be considered to be a security, or that it might be considered to be a security in the future. BCSHOP.IO does not give warranties or guarantees that BCS Tokens are not a security in all jurisdictions. Each holder of BCS Tokens shall bear its own legal or financial consequences of BCS Tokens being considered a security in their respective jurisdiction.

Every Participant is bound to check if acquisition and disposal of BCS Tokens is legal in his jurisdiction, and by accepting these Terms, each Participant undertakes not to use BCS Tokens should their use not be legal in the relevant jurisdiction. If a Participant establishes that the use of BCS Tokens under these Terms is not legal in his jurisdiction, You should not use the BCS Tokens, not acquire them and should immediately stop using or possessing them if such case arises.

Acquiring cryptographic Tokens for personal possession and exchanging them for other cryptographic Tokens will most likely continue to be scrutinized by various regulatory bodies around the world, which has so far given mixed reactions and regulatory impact. The legal ability of BCSHOP.IO to provide BCS Tokens and the Platform in some jurisdictions may be eliminated by future regulation or legal actions. In the event, it turns out with a high degree certainty that BCS Tokens are not legal in certain jurisdiction, BCSHOP.IO will either:

- 1) cease operations in that jurisdiction, or
- 2) adjust BCS Tokens and the Platform in a way to comply with the regulation should that be possible and viable.

B) Risks associated with Ethereum

BCS and BCB Tokens are based on Ethereum blockchain. As such, any malfunction, unintended function or unexpected functioning of the Ethereum protocol may cause the BCS and BCB Tokens to malfunction or function in an unexpected or unintended manner. Ether, the native unit of account of the Ethereum may itself lose value in ways similar to

BCS Tokens, and also other ways. More information about the Ethereum is available at <http://www.ethereum.org>.

C) Risk of unfavorable regulatory action in one or more jurisdictions

Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The functioning of the Ethereum network and associated blockchain networks and BCS Tokens could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of digital Tokens like BCS Tokens, which could impede or limit their existence, permissibility of their use and possession, and their value.

D) Risk of theft and hacking

Hackers or other groups or organizations may attempt to interfere with Your Third-party Wallet, the Website or the availability of BCS and BCB Tokens and Digital Assets in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks. You hereby agree that BCSHOP.IO shall have no liability for any such loss the Participant incur.

E) Risk of security weaknesses in the Website and/or BCS and BCB Tokens source code or any associated software and/or infrastructure

There is a risk that the Website and BCS Tokens may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of BCS Tokens.

F) Risk of weaknesses or exploitable breakthroughs in the field of cryptography

Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Ethereum, BCS tokens, the Platform, which could result in the theft or loss of BCS tokens.

G) Risk of mining attacks

As with other decentralized cryptocurrencies, Ethereum blockchain, which is used for the BCS tokens, is susceptible to mining attacks, including but not limited to double-spend attacks, majority mining power attacks, “selfish-mining” attacks, and race condition attacks. Any successful attacks present a risk to the BCS tokens, expected proper execution and sequencing of BCS tokens, and expected proper execution and sequencing of Ethereum contract computations in general. Despite the efforts of BCSHOP.IO and Ethereum Foundation, the risk of known or novel mining attacks exists. Mining Attacks, as described above, may also target other blockchain networks, with which the BCS tokens interact with and consequently the BCS tokens may be impacted in that way to the extent, described above.

H) Risk of low or no liquidity

Even though there are currently online service available, which enable possibility of exchange of cryptographic tokens between themselves, and also, some of them enable exchange of cryptographic tokens for fiat money, there are no warranties and/or guarantees given that BCS tokens will be listed or made available for exchange for other cryptographic tokens and/or fiat money, and no guarantees are given whatsoever with the capacity (volume) of such potential exchange. It shall be explicitly cautioned, that such

exchange, if any, might be subject to poorly understood regulatory oversight, and BCSHOP.IO does not give any warranties in regard to any exchange services providers. Participants might be exposed to fraud and failure. In any case, BCSHOP.IO will not enable exchange of BCS tokens for other cryptographic tokens or for fiat currency. Participant may not at any given time be able to acquire or dispose of its BCS tokens due to lack of liquidity.

I) Risk of loss of value

Value of BCS tokens may fluctuate and their Participants might suffer loss in value of such acquired tokens. There might be different reasons that would cause unfavorable fluctuations of the value of the BCS tokens.

J) Risk of uninsured losses

BCS tokens are unlike bank accounts or accounts at some other financial institutions and are entirely uninsured.

K) Risk of malfunction in the Ethereum network or any other blockchain

It is possible that the Ethereum network or any other network, to which the BCS tokens are interacting with, malfunctions in an unfavorable way, including but not limited to one that result in the loss of BCS tokens

L) Internet transmission risks

The Participant acknowledge that there are risks associated with using the BCS tokens including, but not limited to, the failure of hardware, software, and Internet connections. The Participant acknowledge that BCSHOP.IO shall not be responsible for any communication failures, disruptions, errors, distortions or delays You may experience when using the Website and BCS tokens, howsoever caused.

M) Unanticipated risks

Cryptocurrencies and blockchains are new and untested technology. In addition to the risks set forth here, there are risks that BCSHOP.IO cannot foresee and it is unreasonable to believe that such risks could have been foreseeable. Risks may further materialize as unanticipated.

N) Insufficient interest in BCSHOP.IO, the Platform and BCS tokens

It is possible that BCSHOP.IO, BCS tokens or Platform will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of the Platform.

O) BCS tokens and the Platform, as developed, may not meet the Participant's expectations

The Platform is currently under development and may undergo significant changes before release. The Participant's expectations regarding the form and functionality of the Platform and BCS tokens may not be met upon release of new Website, deployment of the Platform, additional products and services for any number of reasons, including a change in the design and implementation plans and execution of the implementation of BCS tokens.
